

In May 2015, 450 people participated in three 'Living Well in Localities' Roadshows in Glasgow, Dundee and Edinburgh.

All improvement is local. Localities are the space where relationships between professionals and the local community change lives – where we improve outcomes for and with local people. Our Roadshows celebrated the many 'bright spots' in localities across Scotland.

Objectives of the events were:

- Learn with, and from, other partnerships implementing new models of integrated care and support for people with complex and multiple conditions
- Understand the support that can help you build capacity and capability for change
- Consider and shape the developing national guidance on localities
- Plan your next steps in your integration journey to better outcomes

## Resource Zone

Local and national teams hosted 'pop up' cafe conversations and shared materials in a Resource Zone at each event.

## What matters to you?

Delegates were asked to reflect on what would help them to live well in their own locality. These words describe what matters to them.

Each partnership was invited to share the story of their Locality journey in a world café session. This gave partnerships the opportunity to hear what is happening in other areas and learn from each other. The Locality story boards will be collated and uploaded onto the JIT website.
